

SHIVAM MALGE

SOFTWARE ENGINEER

Bengaluru | Shivammalge@gmail.com | +91 8618169821 | [LeetCode](#) | [LinkedIn](#) | [GitHub](#)

Results-driven Software Engineer focused on automating complex technical bottlenecks and architecting scalable, user-centric systems. Proficient in Python, modern JavaScript (React/Next.js), and API reverse-engineering, I combine deep technical curiosity with strict system design principles to deliver high-performance web applications, robust automation tools, and impactful engineering solutions.

PROJECTS

Stack-n-Flow | Next.js, React, Node.js, PostgreSQL, Prisma

- **Frontend:** Next.js, React, TypeScript, Tailwind CSS, Framer Motion.
- **UI Components:** shadcn/ui, Lucide React.
- **Backend & Database:** Node.js, PostgreSQL, Neon DB, Prisma ORM.
- **Authentication:** NextAuth.js (Auth.js), Google OAuth.
- Built a dynamic algorithm visualization engine with React and Framer Motion, utilizing a custom state-snapshot pattern to animate complex execution steps. Engineered a robust PostgreSQL and NextAuth backend, delivering role-gated, interactive learning modules to streamline computer science education.

LeetCode GraphQL Automation Pipeline | Python, JavaScript, Data Parsing, Network Analysis

- **Preprocessor:** Python
- **Injector:** JavaScript
- Engineered a hybrid Python/JS pipeline to reverse-engineer LeetCode's GraphQL API and bulk-import interview questions for 340+ companies.
- Bypassed backend authentication via browser console injection and active cookies, cutting a multi-week placement department task down to 5 minutes.

Swarm Drone Framework | Python, Distributed Systems, Simulation

- **Language:** Python
- **Simulation:** Event-Driven Architecture
- Developed a Python-based distributed swarm simulation framework for autonomous UAV coordination and collaborative mission planning.
- Designed modular simulation components to model inter-drone communication, decentralized decision-making, and scalable swarm behavior.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript.

Web/Databases: React, Next.js, Node.js, PostgreSQL, MongoDB

Tools: Git/GitHub, Chrome DevTools, REST/GraphQL APIs.

Frameworks: Node.js, React, Next.js, Express.js

Other Skills: HTML5, CSS3, Tailwind CSS

KEY ACHIEVEMENTS AND LEADERSHIP EXPERIENCE

- **GitHub: 405+ Commits.**
- As Student Placement Coordinator at Atria Institute of Technology, I facilitated peer placement training, moderated group discussions, and served as the primary liaison connecting the student cohort with the placement department.

EDUCATION

B.E Computer Science Engineering & Data Science

Oct 2023 - Oct 2027

Atria Institute of Technology

- 7TH Semester Student in Department of CSDS
